

M i x x

Designed by Alan Jay Paull

Personal and practical. Mixx blends cost-effective product engineering with smart style options to create your own individual workspace.

Mixx's active ingredients include floating worksurfaces or fixed worksurfaces with plinth bases, front-mount modesties, or inset center modesties.

Floating Worksurface Spacers in Cream, Matte Black, and Matching Wood Finish

Mixx is crafted in domestic White Oak veneers from sustainable forests. Matched narrow-heart and quarter cut oak veneered panels exhibit all the warmth and texture of natural wood while maintaining a consistent look throughout the Mixx product offering.

In contrast, Mixx is also available with a solid color coating for doors and modesties adding a distinct look to any office environment.

Mixx elements that suit your individual working style with choices of configurations, worksurface shapes, filing, and storage units. From basic overhead storage to a variety of defined storage towers with paper management, all of your workspace requirements will be met. To further personalize your space, Mixx it up with design elements including hardware, edge details, modesty panel materials, frosted glass doors, metal accents, and several wood and solid color finishes.

For an open plan environment, Mixx adjacent workspaces with overhead storage units to define each workspace, promote interaction, and still maintain privacy.

Mixx's design elements include three edge details, four hardware styles, eight wood finishes, and four surface finishes.

NOTE: Wood and surface finishes shown on this page are photographic representations and only approximate the actual color. Paull Office recommends ordering a finish sample.

Hardware

Tab and Block style hardware are used for both pull and knob applications. All hardware is available in a satin nickel finish, except Tab, which is also available in matte black.
