OFFICE

Paul l Group

P a u l l G r o u p

The Paull Group is a free-standing
casework system integrating
finely-crafted wood cabinetry with
functional components and design
elements, offered in wood, glass
and metal.

Designed by Alan Jay Paull

Paull Group uses the finest
hardwood veneers and solids with
a durable catalyzed lacquer finish.

The extensive system vocabulary
of modular components allows for
limitless possibilities, from private
offices to multi-user environments. To
meet changing requirements, Paull
Group may be reconfigured in the field.
Responsive to special needs, custom
capabilities are available.

Versatility is not limited to functional components. A variety of office personalities can be created, ranging from contemporary to traditional, through a broad range of design elements. Choices include: Several edge details, hardware styles, top shapes, and an array of wood finishes.

A unique design element, the Top Unit Pediment, is available in two silhouettes. The **Gabled Pediment** (large photo) adds a traditional detail, while the **Arched Pediment** (above) evokes a transitional look.

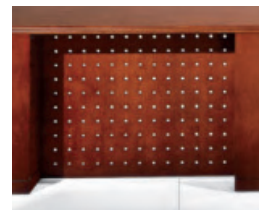

Solid wood base moldings may be specified on most lower components. Base moldings are offered in two styles. The **Capitol Base Molding** (shown at right, top) reflects a modified ogee edge. The **Century Base Molding** (shown at right, bottom) is defined by a chamfered edge.

Another expression of Paull Group's flexibility is through the choice of three available desks: Flush Front, Recessed Front, and Step Front. To punctuate the Step Front desk, choose from a selection of modesty panels including: raised, arched, metal, or perforated. The Perforated Modesty Panel is available in either wood veneer or satin-finished metal.

Recessed Front Desk

Mobile Pedestals support hoteling work environments, allowing your work to follow you to any workspace. The **Flip Top Pedestal** (left) offers an open file bin and box drawers. The **Tray Top Pedestal** (right) includes a box and file drawer with an optional cushion to provide additional seating.

A workspace storage wall, with the addition of a Run-Off Desk, is very frugal in its use of floorspace. Tall Filing and Storage Units, Overhead Storage, and the Accessory Wall with Organizing Elements put everything within arms reach.

The sweeping curves of the Sailfin Conferencing Desk and additional worksurfaces create a sophisticated working environment. Run-Off and Conferencing Desks are available in a variety of top shapes.

You don't get a second chance to make a first impression. Paull Group has the ability to extend past the office door into reception areas, meeting and conference rooms. Reception stations are available in L-shaped or U-Shaped Configurations and offer several modesty and transaction top design and material options.

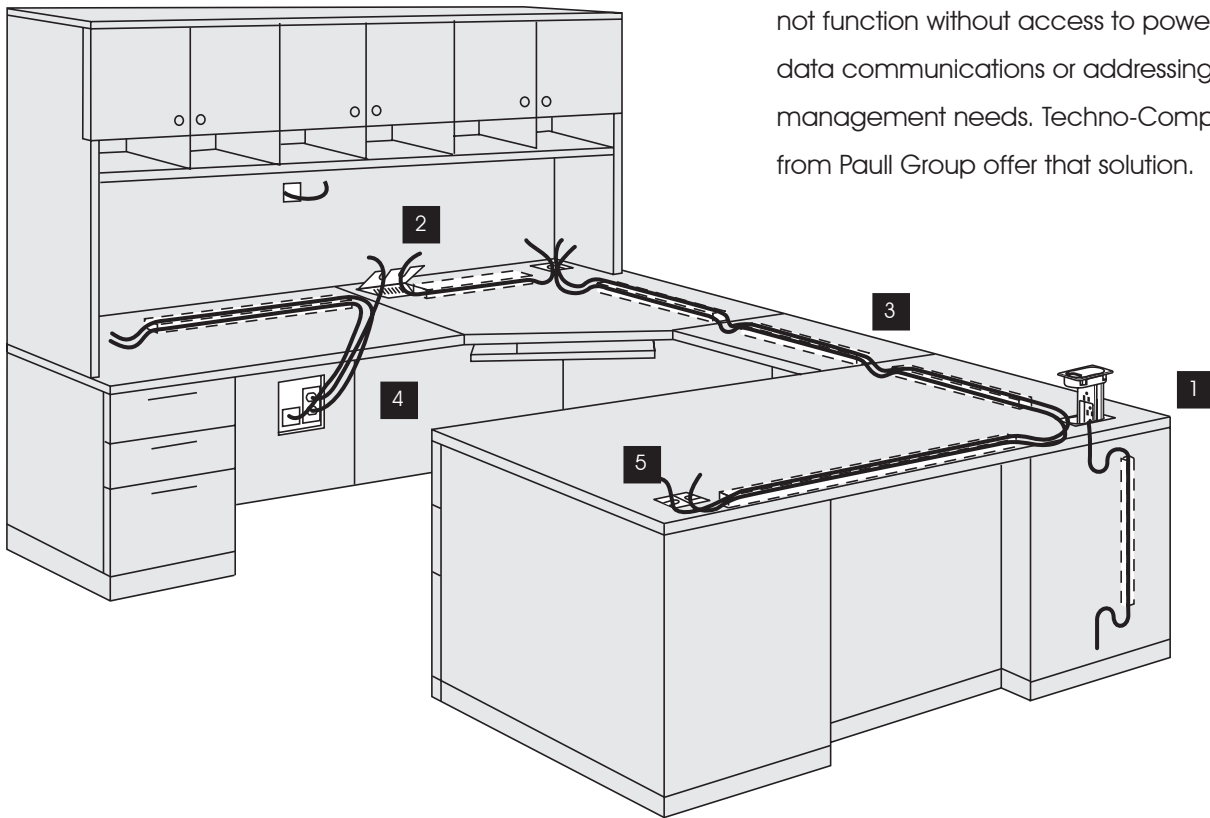

Conference and Meeting Tables are available in several shapes, sizes, and base or leg options. The Recessed Power/Data Center allows electronic accessibility. Occasional Tables complete Paull Group's broad table offering.

Techno-Components

In today's work environment, furniture can not function without access to power and data communications or addressing wire management needs. Techno-Components from Paull Group offer that solution.

1. | Retractable Power |
Data Center

2. | Recessed Power |
