Paull Group Conferencing Options is a versatile and elegant collection of meeting, conference, and boardroom tables, as well as casegood elements to complete every conferencing environment. Communication and electronic requirements are also met through an extensive offering of power and data options.

Designed by Alan Jay Paull

Exotic Birdseye Maple veneer is framed by a 2½" wide solid Maple Knife Edge detail. Recessed Power and Data Centers provide power and communication ports at the worksurface level.

Conferencing Options uses the finest Eastern Hard Maple veneers and solids finished utilizing a durable, catalyzed lacquer available in ten distinct finishes.

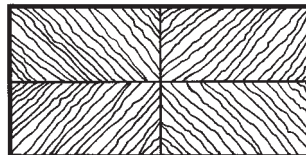

Optional Pattern Veneers or Exotic Birdseye Maple make an impressive boardroom statement. Pattern Veneer selections include: Reverse Diamond (shown at right, top), Diamond (shown below), and Checkboard. Birdseye Maple (shown at right, bottom) and Pattern Veneers are available on most Conferencing Options tables.

A variety of boardroom personalities, from contemporary to traditional, can be created through a broad range of design elements. Selections include: several top shapes and veneer pattern options, eleven different edge details, and fourteen base styles.

This transitional boardroom table is highlighted with a checkerboard pattern veneer top. Drum bases are detailed with optional Capitol Base Molding. Complimenting the table is a multi-component serving/storage credenza, as well as a visual board with matching checkerboard pattern veneer doors.

Video Conferencing Table System

Understanding the multi-functional and communication requirements of today's conference room, Video Conferencing design allows each person at the table to have direct visual access to the camera and monitor. Expanding table wings pivot from the round linking table to allow for optimum positioning. The Table System is not limited to video conferencing; it may be reconfigured for other functions such as meetings, presentations, and seminars.

Round linking tables are available in either a black thermofuse surface or matching Maple veneer. The Disc Base is offered in either a matte black or satin aluminum finish. Functional cabinets support large monitors and DVD/VCRs, as well as provide additional storage.

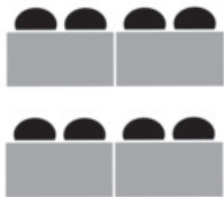

Team Table System

The Team Table System offers several free-standing tables that may be linked together to facilitate meetings, seminars, lectures, training sessions, luncheons, and conferences.

Tops are crafted in Maple veneers and solids then protected with a catalyzed lacquer finish. Several leg options, casters, modesty panels, and power /data components complete the Team Table System.

The flexibility of Paull Group Conferencing Options is demonstrated by a Round Meeting Table with Twin Triangle Base and Bevel edge detail, above; and below, is an Arc End Conference Table with a Quad Column Base and Cove edge detail.

A Boatshape Conference Table, above, with an Ellipse edge detail is featured with Power/Data Spheres and a Wire Access Door in the Half Drum Base. At left, a Round Meeting Table is shown with satin aluminum, Flaired Metal Legs and Bevel edge detail. Below, a Racetrack Table with Drum Bases and Radius edge detail incorporates a Recessed Power/Data Center.

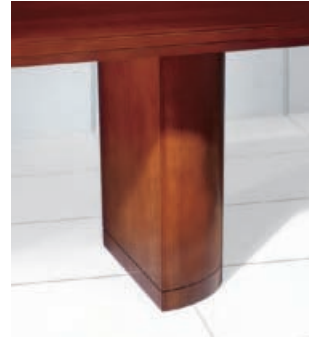

Bases

Fourteen different base styles are offered by Paull Group Conferencing Options. Maple bases are available in any one of ten standard Taylor finishes and may be enhanced with optional base molding. Metal bases are finished in either satin aluminum or matte black. Most bases will accommodate wire management and electrical access; refer to the Conferencing Options Planning Guide.

Premium Edges:

Premium Edges are shaped from 2 1/2" wide solid Maple, which frame each

conference table. Mitered corners enhance each of the three stylized, classic shapes. Premium Edges offer a unique scale, especially well-suited for use with any of the Pattern Veneer options or Birdseye Maple veneer.
